# The District of Columbia Air National Guard

Is an Equal Opportunity Affirmative Action Employer

**Technician Announcement Number:** 06-045

**Position:** Aircraft Engine Mechanic Leader, 80598000, WL-8602-10

**Brief Description of Duties:**

Provides direction to resolve problems on aircraft engines and propellers in a field level environment. Leads three or more engine mechanic subordinates in diagnosing malfunctions, troubleshooting, and evaluating propulsion performance tests to determine the disassembly necessary for repair or replacement of parts. Monitors work of assigned personnel, set the work pace, convey work assignments, and ensure that materials, tools, equipment, and stock are available. Coordinates and works with aircraft mechanics and specialist personnel performing journey level work. Ensures that assigned personnel are fully utilized and work is accomplished in accordance with established time frames and priorities. Checks work in progress and/or upon completion for compliance with the supervisor's instructions, appropriate technical orders, etc. Advises the supervisor of overall work operations, status and progress of work, causes for delays, problems encountered, and individual performance (e.g. additional on-the-job training requirements for individual employees). As requested by the supervisor, provides functional planning for the inspection docks. Performs other duties as assigned.

**Qualifications:** WL-10

**General Experience:**

Experience which demonstrates the candidate has the ability to lead other technicians and provide technical assistance and guidance to lower graded workers.

**Specialized Experience:**

Must demonstrate **Twenty Four (24) month's** experience in which the following Knowledge, Skills, and Abilities (KSA's) as described below have been attained.

**Knowledge, Skills and Abilities (KSA's) Statements**

- A. Knowledge in installing, removing, operating and repairing a variety of conventional and modified aircraft engines and engine accessories systems on and off the aircraft.
- B. Knowledge and understanding of jet engine theory and the integration of the jet engine with all aircraft systems to troubleshoot malfunctions and accomplish repairs.
- C. Knowledge of the types and extent of mechanical adjustments and alignments required.
- D. Skilled in removing, replacing and adjusting various systems and assemblies, as well as associated components and parts on aircraft engines.
- E. Skilled in using precision test equipment, technical data, schematics, wiring diagrams, mathematical formulas, common hand tools, jigs, templates and gauges.

**Current Unit assignment, AFSC/SSI and Military grade must be included on application.  
Incomplete applications will not be considered for employment.**

**This announcement must be posted on unit bulletin boards until the day following the closing date.**
